

DeepMT Digital UI & System Guidelines

UI Framework & Web Standards | Parent Brand: AMT Entertainment | Version 2.0

1. Minimalist UI Philosophy

The DeepMT interface emphasizes extreme visual simplicity, high contrast, and uncluttered content layout. The UI should act as a quiet canvas, letting AI outputs and media take center stage while relying on subtle organic accents rather than heavy decorative elements.

2. Typography System

- Display & Headings:** *Playfair Display* (Serif). Matches the logotype aesthetic. Use for page titles, modal headers, hero text, and major section headlines.
- Body Text & Interface UI:** *Inter* or *Plus Jakarta Sans* (Clean Sans-Serif). Use for functional UI elements, navigation links, buttons, inputs, and long-form body content to ensure maximum screen legibility.
- Code & Technical Displays:** *JetBrains Mono* or *Fira Code* (Monospace). Use for prompt boxes, API outputs, and raw data representations.

3. Color Tokens & Application

Token Name	Hex	Role & UI Context
Brand Teal	#88B0A8	Primary UI accents: active button states, focus rings, active navigation tabs, icons, progress indicators.
Warm Cream	#F1F4E0	Default light mode background canvas, card containers, dialog boxes, soft dropdown backgrounds.
Deep Charcoal	#1C1C1C	Dark mode background canvas, dark UI surfaces, primary text color in Light Mode.
Soft Muted Border	#D0DCD8	1px subtle container dividers, input borders, and card outlines in light theme.

4. UI Components & Layout Rules

- Navigation Bar:** Keep clean and sticky at the top. Feature the *DeepMT* logo on the left at 32px height, with simple sans-serif navigation items set in *Inter* on the right.
- Buttons & Controls:** Use soft rounded corners (border-radius: 8px). Primary buttons use **#88B0A8** fill with dark text or outline options with 1.5px teal borders.
- Cards & Containers:** Flat design with 1px border (**#D0DCD8** in light mode, **#333333** in dark mode). Avoid heavy drop shadows; rely on background contrast to create depth.
- Spacing & Layout:** Generous whitespace (padding of 24px–32px inside cards) to keep the feel light, modern, and uncluttered.
